

each house was thus in the neighborhood of 375 dinars (almost a thousand American dollars). With such capital as this involved, building is a serious business and litigations between owner and mason appear frequently before the judge. Poorer townspeople with a flair for the work sometimes build their own simple homes, but anything larger requires the specialist. In such smaller constructions Rowanduz seems to have little "communalism," for, while the neighbors may lend a hand, there is no tradition which requires the aid of others.

Some of the important details of house construction will be found in the succeeding section. There is one person in the town who devotes himself to the manufacture of mud-bricks and the supply of large pieces of uncut stone, these last used for thresholds, courtyards, steps, and the like. The moistened soil for bricks is mixed with chaff and moulded with a wooden form. The shaped bricks are laid out in rows in the sun to dry, and, when hardened, are ready for construction. No fire-burnt bricks are manufactured in the town. There is no special place for brick-making, and in 1951 an empty lot near the house of Isma'il Beg was used for this purpose. Similarly, there is no particular stone-quarry for the district, and any convenient outcrop may be used. The people of the district are not skilled in stoneworking, and most pieces, usually of limestone, are only crudely roughed into flat, irregular slabs. Mud-brick, because it is more easily
